

Photoetching - Illustrated Drawing Sample

Outside Rake 3.00 mm

Attach Point

Metal Thickness (T)	A	B
< 0.25 mm	0.30 mm	0.50 mm
≥ 0.25 mm	T+0.10 mm	T+0.20 mm

Etching Split

Metal Thickness (T)	1
< 0.60 mm	0.50 mm
≥ 0.60 mm	T

The drawings for photo etching must be in vectorial format, and can be realized in various programs. In this sheet it's showed how to realize the drawing of a kit of plates in CorelDraw, Illustrator or FreeHand, front and back. The black areas correspond to the etched areas. The drawing must be in CMYK and the black must be absolute. The characters must be converted to curves. Comply with the dimensions of the attacks and the indicated lines of cut. For the tolerances you see our technical sheet 01.
